EDUCATION

Sai Gon University <i>B.S. Computer Science</i>	Step.2023 - June 2027 <i>Current GPA: 3.16/4.0</i>
---	---

Languages: C/C++, Python, Java, JavaScript/TypeScript, HTML/CSS, SQL, NOSQL, LaTeX
Framework/Libraries: Spring boot (3.5.7), Spring Security, Spring Data JPA, Websocket, React (19), FASTAPI, MapStruct, Hibernate
Tools: Git/GitHub, Unix Shell, VS Code, IntelliJ IDEA, VSCode, Docker, Maven, Postman, Redis, Cloudinary

SKILLS

Languages: C/C++, Python, Java, JavaScript/TypeScript, HTML/CSS, SQL, NOSQL, LaTeX
Framework/Libraries: Spring boot (3.5.7), Spring Security, Spring Data JPA, Websocket, React (19), FASTAPI, MapStruct, Hibernate
Tools: Git/GitHub, Unix Shell, VS Code, IntelliJ IDEA, VSCode, Docker, Maven, Postman, Redis, Cloudinary

PROJECTS

ShopZues — Scalable E-commerce Platform <i>Laravel, React, Firebase, MySQL, Redis, Docker</i>	Nov 2023
- Implemented a scalable Laravel backend (PHP 8.4) with JWT auth, RBAC (role/permission), and Redis (cache + queue + OTP). - Integrated Firebase Realtime DB for live order status & notifications, and Brevo for OTP email verification. - Developed React frontend + Flutter mobile app that connect to backend APIs and cloud DB (Firebase + MySQL). - Used Docker + docker-compose for consistent dev/test environments and easy deployment. - Learned end-to-end full-stack architecture: auth flows, real-time sync, payment flow, and micro-service patterns.	

EXPERIENCE

Sai Gon University <i>Software Engineering Student</i>	Ho Chi Minh City, Viet Nam <i>Sept. 2023 – Present</i>
- Developed high-performance web systems using Laravel and Spring Boot, focusing on Service-Repository patterns and clean architecture. - Architected secure authentication systems using JWT, OAuth 2.0, and Spring Security, managing stateless sessions and role-based access control (RBAC). - Optimized application performance by implementing Redis for distributed caching and asynchronous background tasks (queues), reducing database load during high-traffic simulations. - Integrated third-party ecosystems including VNPAY for payment processing, GHN for logistics automation, and Firebase for real-time data synchronization. - Containerized applications with Docker and orchestrated development environments using Docker Compose to ensure cross-platform consistency. - Collaborated on version control via Git/GitHub, managing complex branching workflows and maintaining codebase integrity through code reviews.	

HOBBIES

Music & Arts: **Playing the Drums** (2013 – 2019) in symphonic and jazz bands, developing teamwork and rhythmic precision.
Personal Challenges: **Time Keeping Challenge Runner-up** (2022), awarded for exceptional mental focus and time estimation accuracy.
Tech Exploration: Researching **Generative AI (RAG)** and local LLM deployment; building custom mechanical keyboards.
